$\qquad$

## Lesson

## Reteach

Area is the amount of surface a shape covers.

The area of a unit square is 1 square unit.
Unit Square: 1 unit ${\underset{1 \text { unit }}{ } 1 \text { unit }}_{\square_{1}}$ unit

Example Find the area of the shape.

|  | 1 <br> unit |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 <br> unit | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |  |
|  | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 |  |
|  | 17 |  |  |  |  |  |  | 18 |  |
|  | 19 |  |  |  |  |  |  | 20 |  |
|  |  |  |  |  |  |  |  |  |  |

Count the unit squares needed to cover the shape.
20 unit squares cover the shape. The area of 20 unit squares is 20 square units.

So, the area is 20 square units.
Find the area of the shape.
1.

$\qquad$ unit squares cover the shape.
So, the area is $\qquad$ square units.
$\square=1$ square unit
2.
$=1$ square unit
$\qquad$

## Lesson <br> 6.2 <br> Reteach

Unit squares can represent different standard units of area.

| 1 Square Inch: | 1 in . |  | 1 Square Foot: | 1 ft |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | 1 in. | 1 in. |  | 1 ft | 1 ft |
|  | 1 in . |  |  | 1 ft |  |
| 1 Square Centimeter: | 1 cm |  | 1 Square Meter: 1 m |  | 1 m |
|  | 1 cm | 1 cm |  |  |  |
|  | 1 cm |  |  |  |  |

Example Find the area of the shape.

$\square=1$ square foot

5 unit squares cover the rectangle.
Each unit square represents 1 square foot.
So, the area is 5 square feet.

1. Find the area of the shape.

$\qquad$ unit squares cover the rectangle.

Each unit square represents

```
\(\square=1\) square meter
```

So, the area is $\qquad$ .
$\qquad$

## Lesson

6.3

## Reteach

Example Find the area of the rectangle.
6 ft
2 ft

Step 1: Think of the rectangle as an array.

$\square=1$ square foot
Step 2: Then use repeated addition or multiplication to find the area.
2 rows of 6 unit squares: $6+6=12$, or $2 \times 6=12$
So, the area is 12 square feet.

Find the area of the rectangle.

1. $\qquad$ rows of $\qquad$ unit squares
$\qquad$ $+$ $\qquad$ $+{ }^{+}{ }^{+}$ $\qquad$ $=$ $\qquad$
Area $=$ $\qquad$
2. 

8 in.
$\qquad$
$\times$
6 in.
Area $=$ $\qquad$
$\qquad$

## Lesson <br> 6.4 <br> Reteach

Use the Distributive Property to find the area of the rectangle.

$\square=1$ square foot

Step 1: Count the number of rows.
Step 2: Count the number of unit squares in each row.

Step 3: Think: How can you break apart this large rectangle into smaller rectangles?

Step 4: Use the Distributive Property to find the area of the rectangle.

$$
\begin{aligned}
& 3 \times 6=3 \times(2+4) \\
& 3 \times 6=(3 \times 2)+(3 \times 4) \\
& 3 \times 6=6+12 \\
& 3 \times 6=618
\end{aligned}
$$

So, the area is 18 square feet.

1. Use the Distributive Property to find the area of the rectangle.

$\square=1$ square meter

$\qquad$

## Lesson <br> 6.5 <br> Reteach

Find the area of the shape.

Think: How can you break apart this shape into rectangles?

$\square$ = 1 square meter

$\square=1$ square meter

## Areas of Rectangles

Rectangle A: $3 \times 4=12$ square meters
Rectangle B: $2 \times 7=14$ square meters
Area of the shape: $12+14=26$ square meters

1. Find the area of the shape.

$\square$ = 1 square foot

Areas of Rectangles
Rectangle A: $\qquad$ $\times$ $\qquad$ = $\qquad$ square feet

Rectangle B: $\qquad$ $\times$ $\qquad$ = $\qquad$ square feet

Area of the shape: $\qquad$ $+$ $\qquad$ $=$ $\qquad$ square feet
